SKILLS

Programming: Java

Frontend: HTML, CSS, JSP (JavaServer Pages)

Backend: Advanced Java, JDBC, Servlets, JEE, Spring Core, Hibernate ORM, DAO, Singleton, Factory, MVC Architecture

Database & Core: MySQL, SQL, DBMS, OOP, Operating Systems, Computer Networks

PROJECTS

Food App – Web-Based Food Delivery System

Jun 2026

- **Tech Stack:** Java, JSP, Servlets, JDBC, MySQL, HTML5, CSS3, DAO Pattern, MVC Architecture, JBCrypt
- Developed a **full-stack food delivery platform** with separate Customer and Admin portals, dynamic restaurant and menu browsing, session-based cart, secure checkout, order placement, and order history.
- Implemented secure authentication using **JBCrypt password hashing** and built an Admin Dashboard with complete **CRUD operations** for restaurants, menus, and customer orders.
- Applied **MVC and DAO patterns** with JDBC and MySQL, structured the application into layered components, and deployed the end-to-end application on **Apache Tomcat**.

FashionStore – Java-Based E-Commerce Web Application

Apr 2026

- **Tech Stack:** Java 21, Jakarta Servlets, JSP, JSTL, JDBC, MySQL, HTML5, CSS3, Maven, MVC Architecture, DAO Pattern, Apache Tomcat
- Built a full-stack e-commerce application featuring product categorization, shopping cart, wishlist, secure authentication, checkout, and order placement using **Java 21, Jakarta Servlets, JSP, and MySQL**.
- Implemented **MVC and DAO architecture** to separate presentation, controller, business, and database layers, improving code organization and maintainability.
- Used **Maven** for dependency management and WAR packaging, designed the relational database for users, products, categories, wishlists, and orders, and deployed on **Apache Tomcat**.

EXPERIENCES

TAP Academy

Jan 2026 – Present

Software Development Intern

Bengaluru, India

- Applied **Core Java and OOP** concepts including inheritance, encapsulation, polymorphism, and abstraction through hands-on programming exercises and real-world mini projects.
- Developed dynamic web applications using **HTML, CSS, JSP, Servlets, JDBC, and MySQL**, implementing database connectivity and efficient data operations.
- Practiced **DAO design pattern and JEE concepts** to build clean, maintainable, and scalable full-stack Java applications.

ACHIEVEMENTS

- **Government of India Copyright Application:** Smart Parking System under review (Diary No. **LD-35641/2025-CO**).
- Completed the **Cyber Suraksha Program** conducted by Tata STRIVE and Microsoft, Sep 2024.
- Successfully completed **UML Training** through Infosys Springboard, Dec 2024.

EDUCATION

APS College of Engineering

2022 – 2026

Bachelor of Engineering in Computer Science (CGPA: 8.67)

Bengaluru, India
